

### **2012 Region 3 Spec Tire Rule**

Region 3 spec tire will be the tire that the local Region 3 Track has designated as the spec tire. For example, if HQMA runs a Hoosier spec tire that will be the Region 3 spec tire for that Region Race.

Tires used in qualifying will be marked at the scales after qualifying. The same 2 tires must be used in the A Main of the class that the car qualified in. Tires that are used in 2 classes will be marked twice (i.e. if you qualify in Sr. Honda and Lt. 160 on the same 2 tires these same 2 tires must be used in both Sr. Honda and Lt. 160 A Mains) Tires will be checked again after the A Mains to insure compliance. Only tires that are punctured will be allowed to be changed. Punctured tire and replacement tire must be present to be checked by tech official.

Any left side tires will be allowed.

All novice classes are exempt from the spec tire program and will be able to use any brand tire they wish.
